THE POST

College: College of Life and Environmental Sciences
Post: Postdoctoral Research Associate
Reference No: P50316
Grade: E
Reporting To: Lena Bayer-Wilfert

The above 14m full-time post is available from 1st August 2017 at the Penryn Campus.

Job Description

Main purpose of the job:

To assist Dr Lena Bayer-Wilfert to run a project investigating the impact of agri-environment schemes on emerging diseases in pollinators.

- study differences in disease transmission dynamics in multi-host pathogens of pollinators based on field-collected samples;
- detection, quantification and sequencing of RNA viruses; qPCR quantification; microsatellite analysis of host genetic diversity;
- phylodynamic reconstruction of disease transmission patterns;
- population genetics of host diversity;
- model-based epidemiology;
- Liaising with Exeter Sequencing centre for amplicon sequencing of viral RNA.

Main duties and accountabilities:

1. To undertake research as appropriate to the field of study including:
   - Writing up research work for publication;
   - Developing research objectives and proposals for own or joint research;
   - Making presentations at national and international conferences and similar events;
   - Dealing with problems which may affect the achievement of research objectives and deadlines;
   - Analysing and interpreting the results of own research and generating original ideas based on outcomes;
   - Using new research techniques and methods;
   - Using initiative and creativity to identify areas for research, developing new research methods and extending the research portfolio;
   - Using creativity to analyse and interpret research data and draw conclusions on the outcomes.

2. To contribute to teaching and to be involved in the assessment of student knowledge including assisting in the supervision of student projects and in the development of student research skills.

3. To work in collaboration with colleagues as appropriate to the field of study including:
   - Contributing to collaborative decision making within the research group;
   - Contributing to the production of collaborative research reports and publications.
   - Preparing papers and presenting information on research progress and outcomes to bodies supervising research, e.g. steering groups.
4. To communicate complex information, orally, in writing and electronically.

5. To prepare proposals and applications to external bodies, e.g. for funding and contractual purposes.

6. To contribute to the planning of research projects.

7. To use research resources, laboratories and workshops as appropriate and to take responsibility for conducting risk assessments, reducing hazards and for the health and safety of others.

8. To monitor research budgets as appropriate.

9. To engage in continuous professional development and to be responsible for continually updating knowledge and understanding in field of study or specialism and for developing skills.

This job description summarises the main duties and accountabilities of the post and is not comprehensive: the post-holder may be required to undertake other duties of similar level and responsibility. Please visit the Human Resources website to view the Research Fellow role profiles.
