
THE POST

College:	College of Engineering, Mathematics and Physical Sciences
Post:	Industrial Research Associate
Reference No:	P57119
Grade:	E
Reporting To:	Director of the Institute for Data Science and Artificial Intelligence

The post is available immediately until 28th February 2021 and is part of a project, the 'Environmental Futures and Big Data Impact Lab', involving the University of Exeter, University of Plymouth, Met Office, Plymouth Marine Laboratory, Exeter City Futures, Rothamsted Research and Plymouth College of Art. It is funded through the European Regional Development Fund and forms part of the European Strategic Investment Framework for the Heart of the South West.

Job Description

This role is funded through the European Regional Development Fund (ERDF) supported Environmental Futures and Bid Data Impact Lab. This is a 3 year project to support research, innovation and the development of new products and services small and medium sized enterprises.

The Impact Lab provides a business-focussed innovation ecosystem, which combines existing R&D assets, infrastructure and expertise, and generates new innovation engagements between businesses and the knowledge base.

Main purpose of the job:

The Postdoctoral Research Associate will work with collaborating business partners and organisations to fulfil the research, development and innovation (RD&I) activities set out within the project's specific RD&I Project Plan. The post holder will work closely with appointed business partners, delivery partners, academic supervisors and members of the University's Impact, Innovation and Business (IIB) directorate to discharge the requirement of the Impact Lab Project Plan. The primary purpose of the role is to deliver economic impact within participating, and where relevant/ appropriate newly identified businesses from RD&I activities.

Main duties and accountabilities:

1. To undertake research as appropriate to the field of study including:
 - Writing up research work for publication;
 - Developing research objectives and proposals for own or joint research;
 - Making presentations at national and international conferences and similar events;
 - Dealing with problems which may affect the achievement of research objectives and deadlines;
 - Analysing and interpreting the results of own research and generating original ideas based on outcomes;
 - Using new research techniques and methods;
 - Using initiative and creativity to identify areas for research, developing new research methods and extending the research portfolio;
 - Using creativity to analyse and interpret research data and draw conclusions on the outcomes.

2. To contribute to teaching and to be involved in the assessment of student knowledge including assisting in the supervision of student projects and in the development of student research skills.
3. To work in collaboration with colleagues as appropriate to the field of study including:
 - Contributing to collaborative decision making within the research group;
 - Contributing to the production of collaborative research reports and publications.
 - Preparing papers and presenting information on research progress and outcomes to bodies supervising research, e.g. steering groups.
4. To communicate complex information, orally, in writing and electronically.
5. To prepare proposals and applications to external bodies, e.g. for funding and contractual purposes
6. To contribute to the planning of research projects.
7. To use research resources, laboratories and workshops as appropriate and to take responsibility for reducing hazards and for the health and safety of others. Where appropriate, will also be responsible for conducting risk assessments.
8. To monitor research budgets as appropriate.
9. To engage in continuous professional development and to be responsible for continually updating knowledge and understanding in field of study or specialism and for developing skills.

This job description summarises the main duties and accountabilities of the post and is not comprehensive: the post-holder may be required to undertake other duties of similar level and responsibility. Please visit the Human Resources website to view the Research Fellow role profiles.

Person Specification

Competency	Essential	Desirable
Attainments/Qualifications	PhD (OPTIONAL or nearing completion) or equivalent qualification/experience in a related field of study.	
Skills and Understanding	Sufficient knowledge in the discipline and of research methods and techniques to work within established research programmes.	Evidence of research activity and published research.
Prior Experience	Understanding of health and safety legislation	Experience of undergraduate teaching
Behavioural Characteristics	Excellent written and verbal communication skills. Able to communicate material of a specialist or highly technical nature. Able to manage research and administrative activities and to balance the competing pressures of research and administrative demands and deadlines. Able to liaise with colleagues and students.
